

Leonardo Del Castillo

Leonardo Del Castillo is a hardware engineering and product development leader with experience leading multidisciplinary teams delivering world-class consumer-electronic products, including Xbox, Xbox 360, and Xbox One game consoles, Kinect and Xbox accessories. He was recruited to the Microsoft Hardware group in 1995, where he initially worked on the ActiMates project. In 1999, Leonardo joined the Xbox hardware team as one of its founding members. He worked on each Xbox console through the release of the Xbox One X, as well as the Kinect device and several controllers. He retired in 2022 as Vice President of Hardware Engineering.
