

Dan Fay

With more than 20 years of experience in advanced computing technologies, Daniel Fay is a leader at the forefront of innovation. As Senior Director of Strategic Engagements for Microsoft Research, he defines and drives strategies for emerging technologies, leveraging deep expertise in both software and hardware.

Daniel has led multidisciplinary teams tackling complex scientific challenges and has developed impactful programs, such as Azure for Research, which introduced cloud computing to academic researchers. His diverse technical background spans Internet of Things, cloud computing, high-performance computing, grid computing, and scientific collaboration and visualization tools.
